

ENVIRONMENTAL
STRATEGIES

ESTABLISHED 1998

Environmental Strategies Ltd Declaration

Every attempt has been made to ensure that the primary activity data and the secondary modelled data, provided by Bell Lighting, is accurate and that the carbon footprint is a fair reflection of the company's emissions within the stated boundary and scope.

The primary and secondary data accuracy remains the responsibility of Bell Lighting. Authoritative, UK Government-approved, carbon calculation information sources have been utilised in the estimation of the footprint, along with consistent and approved GHG Protocol methodologies. Whilst the carbon footprint can only ever be an "estimation," the tCO₂e is believed to be correct, based on the previous statements, and all the required PPN 006 emission sources have been included.

If provided with any information affecting the validity of the footprint, Environmental Strategies Ltd will investigate.
