

Environmental Strategies Limited Declaration

Yorkshire Packaging Systems (YPS) are one of the UK's leading suppliers of high quality, durable packaging machinery and sustainable packaging materials manufactured in-house at their production facilities in Heckmondwike and Brighouse, Yorkshire.

A baseline of Scope 1 and Scope 2 carbon emissions was determined for the 2022-23 financial year (FY23). A subsequent energy audit at each production facility has identified how these emissions can be reduced over time. The reduction trajectory and target is science-based.¹

The company have set a near term target of a 42% absolute reduction in Scope 1 and Scope 2 emissions (market-based) by 2030, against the 2022-23 baseline. The company are also considering setting a long-term Net Zero Carbon target by 2050, which will require calculation of Scope 3 emissions and validation.

The primary and secondary data accuracy remains the responsibility of YPS. However Environmental Strategies Ltd has analysed both the primary activity data and the secondary modelled data, provided by YPS, and determined that the carbon footprint is a fair reflection of the company's emissions within the stated boundary and scope. Authoritative, UK Government-approved, carbon calculation information sources have been utilised in the estimation of the footprint, along with consistent and approved GHG Protocol methodologies.

If provided with any information affecting the validity of the footprint or target, Environmental Strategies Ltd will investigate.

Helen Sprakes, Director, Lead GHG Verifier
